

We're here for the Patricia Gibbons Family of Manning

Mr. Ed Frye
Chief Executive Officer
Clarendon Health System
10 Hospital St.
Manning, S.C. 29102

Dear Mr. Frye,

Our mother, Mrs. Rena MacFaddin, was recently a patient at Clarendon Memorial Hospital, in and out on many occasions during her lifetime until her death on July 3, 2008. She had been in Clarendon Health System and then transferred to Providence Hospital in Columbia, S.C., battling Congestive Heart Failure. After numerous procedures and tests were made, we were told that there was nothing else they could do; her heart was just too weak for any type of surgery. We could only try and keep her as comfortable as possible. At that time the decision was made to return home to hospice which was made available for her and all was going well.

On Monday, June 23rd, her chest pains were so severe that Clarendon EMS was called, and she was admitted back into Clarendon Memorial Hospital.

The entire staff of doctors, nurses, aides and support personnel could not have done more to make this difficult time less stressful for our family. The medical care and consideration she received were excellent. There were many critical times endured, but the quick response she received from the doctors, nurses and respiratory staff made her last days more comfortable. They also made sure that we were taken care of and that our needs were met. There are no words to express our gratitude for all they did. Mom was a special person, our loss is very great and we only wish that the outcome had been different. We gain strength and comfort in knowing that she's resting now.

Although we do not hope for any repeat visits anytime soon, we have no reservation about the quality of service at Clarendon Health System. Our family would like to personally thank each and everyone of you at Clarendon Health System, for you truly made us feel like we were family.
