

We're here for Kimberly Land Of Manning

Dear Mr. Frye
Chief Executive Officer
Clarendon Health System
10 Hospital St.
Manning, S.C. 29102

We recently had our third child and he was delivered in the new Generations wing at Clarendon Memorial Hospital. Being able to remain on the same floor throughout our stay and having a much more spacious room, helped make our experience this time even better than with the birth of our daughters.

As always with Clarendon Memorial, we received great care from all the nurses and staff who are genuinely friendly, courteous and helpful. They seem to go out of their way to help us. My hospital stay was the last time I got seven hours continuous sleep and it was thanks to the wonderful nurses. I wish they made house calls.

Cal and I both enjoyed the Celebration dinner complete with a customized menu and sparkling grape juice. What a great idea to help new parents celebrate the birth of their new baby!

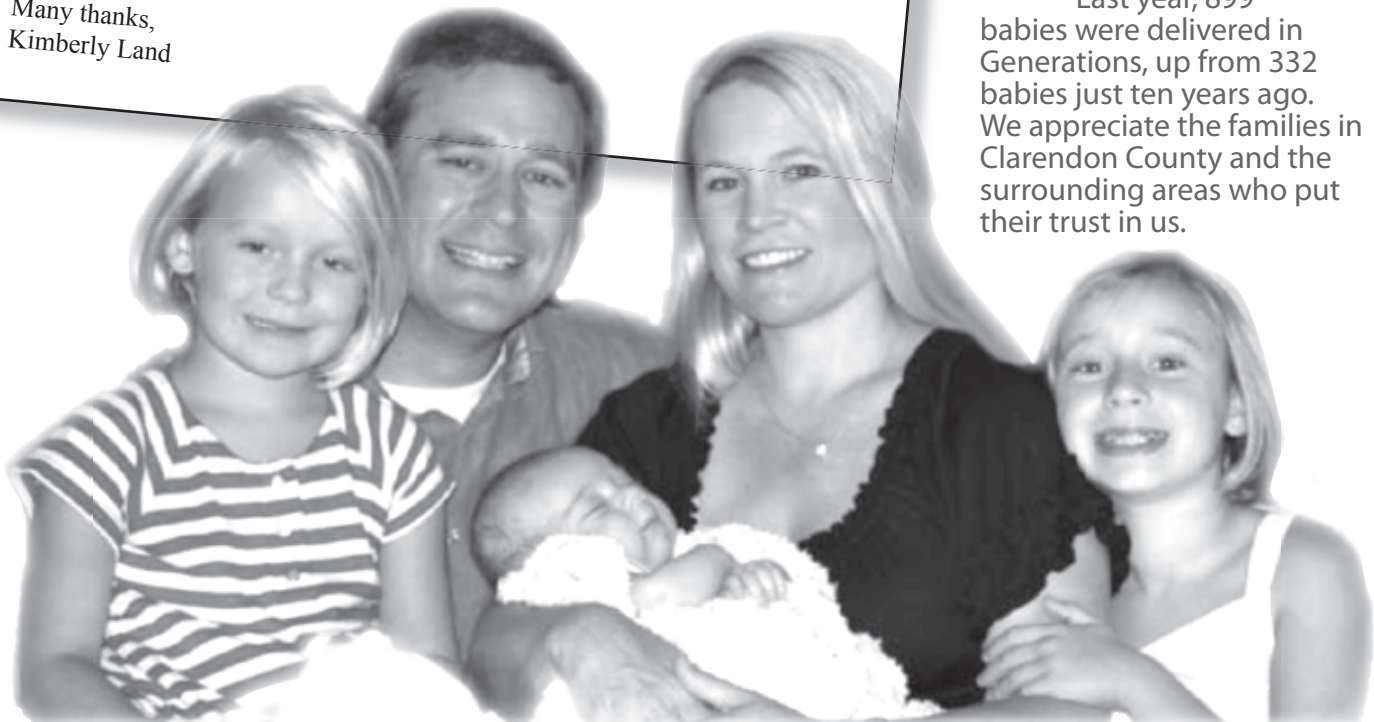

It is so nice to have first rate care provided to us right here at home in Manning. A huge thank you to the Clarendon Memorial family who make that possible. You and your employees really did a fantastic job at providing us with top notch healthcare and creating a comfortable atmosphere to welcome John Calhoun Land V into the world.

Many thanks,
Kimberly Land

GENERATIONS
at Clarendon Memorial

Clarendon Memorial Hospital opened Generations in 2004. It provides labor, delivery, recovery, postpartum and nursery services in a beautiful home-like setting. The experienced staff of anesthesiologists, registered nurses and obstetricians offers a broad range of delivery options, from traditional, epidural-assisted births to more natural approaches. Generations offers one of the few midwifery programs in the region.

Last year, 899 babies were delivered in Generations, up from 332 babies just ten years ago. We appreciate the families in Clarendon County and the surrounding areas who put their trust in us.

For the best hospital care,
out-patient rehabilitation services,
radiology scan and lab tests,
ask your doctor to send you to us
